

Chiller SPORT™

The Highest Standards...
The **SAFEST** Drinking Water

THE LATEST IN BOTTLE-LESS TECHNOLOGY

Water - Drink 8 a Day

Health care professionals recommend that the average person drink at least 8 - eight ounce servings of water every day. Unfortunately, over 2,100 contaminants have been identified as potential threats to the drinking water supply. They fall into four groups: Organic, Inorganic, Biological and Radioactive. A point-of-use water treatment system is ideal for consumers concerned about their local water quality, or who are simply looking to have better tasting water.

Filtration Technology Enhances Drinking Water

The innowave Chiller Sport™ uses 3-stage filtration to treat drinking water. First, a 5-micron Sediment filter traps sediment and solid particle matter. Then, a 1-micron Carbon Block filter reduces contaminants as small as 1-micron. Next, a Granular Activated Carbon filter reduces chlorine and polishes taste.

Tested and Certified Treatment Technology

The innowave Chiller Sport™ uses three different filters to treat the drinking water. First, a 5-micron, Sediment Filter traps sediment and solid particle matter. Then, a Carbon Block Filter traps contaminants as small as one micron. The 1-micron filter used in the innowave Chiller Sport™ has been tested and certified by WQA according to NSF/ANSI Standard 53: Drinking Water Treatment Units - Health Effects for the reduction of at least 90% of lead and 99.99% of cysts. The 1-micron and Granular Activated Carbon filters have also been tested and certified to NSF/ANSI Standard 42: Aesthetic Effects for the improvement of taste and odor and aesthetic chlorine reduction.

ITS™ Controls Bacteria

The innowave Chiller Sport™ is also equipped with ITS™ (In-Tank Sanitization). This feature utilizes ultraviolet light as an effective method to prevent the potential for biofilm (slime) buildup in the storage tank after chlorine has been reduced through carbon filtration. Ultraviolet technology also helps reduce any heterotrophic bacteria that may occur in drinking water. This reduces the need for preventative maintenance and improves drinking water quality.

innowave Chiller Sport™ Specifications

Width: 15.0 in. (38 cm)
Depth: 14.0 in. (36 cm)
Height: 46.0 in. (117 cm)
Water Connection: 1/4" tubing

Weight: 68.3 lbs. (dry)
Power Supply: 120V/60Hz
Amps: 8.3 Amps (Hot/Cold) 1.8 Amps (Cold)
All figures are approximate and subject to change.

The innowave Chiller Sport™ has been tested and complies with UL Standard 399

The innowave Chiller Sport™ Treatment Process

- 1 Sediment Filtration (12-2000)**
 - Reduces particles as small as five microns (.0002 in.)
 - Reduces sediment
 - Adds to the life of the carbon filter
- 2 Micron Filtration (12-2001)**
 - Traps contaminants as small as one micron (.00004 in.)
 - Reduces chlorine and organic contaminants
- 3 Filtration (12-2002) (granular activated carbon)**
 - Improves taste and odor
 - Reduces chlorine
- 4 Ultraviolet Light**
 - Reduces heterotrophic bacteria
 - Valuable alternative to chlorine
